

# Paginated Booklet Set up - no bleeds

Please make sure the amount of pages will come to a whole number when divided by two for the spreads.

Any that end up with fractions will have to have a blank page added to allow for the book to be properly set up.

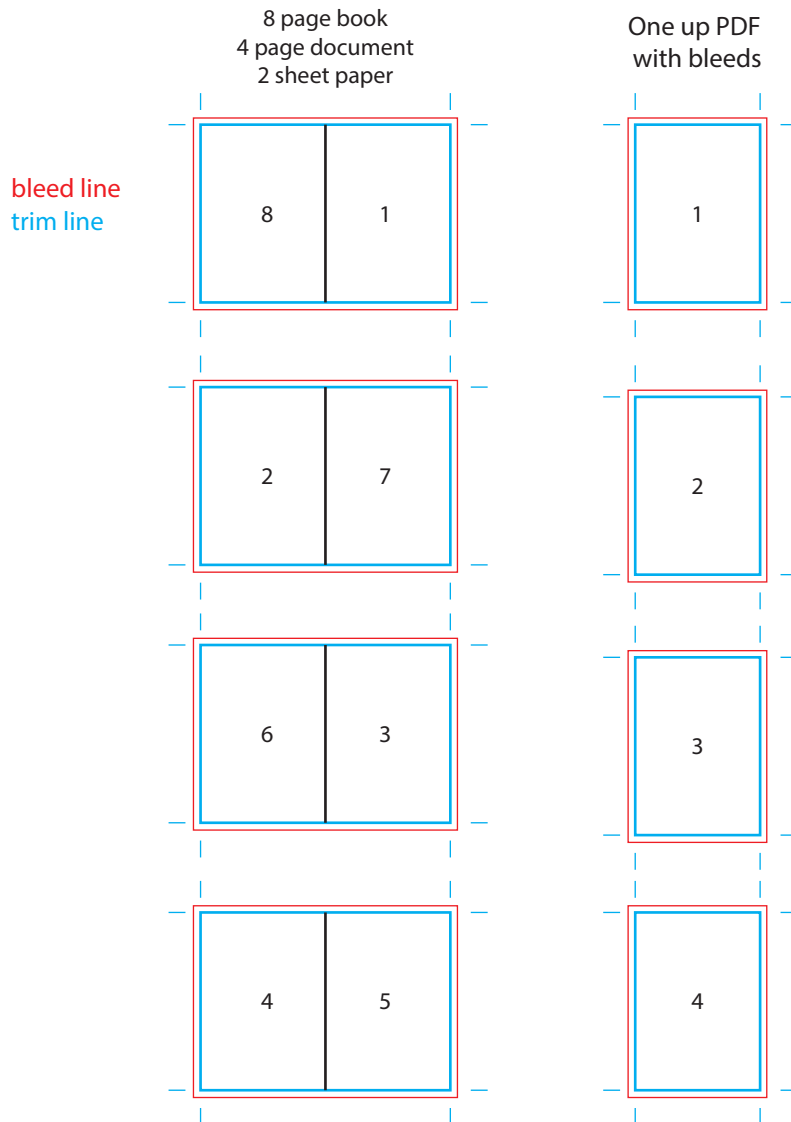

Example:

56 page book becomes a 28 page document = 14 sheets of paper

A 55 page book becomes a 27.5 page document, which will not work, so we have to add a blank page to make it a 56 page book.

## Paginated Booklet Set up - with bleeds

Please have the pages set up like the paginated book, but with added bleeds to the outer edges.  
Or send the pages one up with the bleeds in a PDF and we can paginated for you.
